BioTechniques 65: 111 (September 2018) 10.2144/btn-2018-0116

Since its advent, the internet has been making more and more things possible – including easing the lives of researchers, and increasing our ability to perform more complex research.

Alongside our readers, *BioTechniques* is harnessing the internet more too. Since its move to the publisher Future Science Group and the launch of its new (and still evolving) website, we've been able to bring you a plethora of new and exclusive online-only content, as well as our traditional print articles.

In addition to the latest news content, our website is now home to informative webinars, methods videos, podcasts and opinion pieces from key experts. And that isn't all – journal articles can now host video abstracts and supplemental videos. We've also launched a new glossary of key terms.

To ensure you, our readers, do not miss out on this content, going forward each print issue will include a second contents page highlighting our Editors' picks of online-only content each month.

Turn to page 174 of this issue to view this month's online highlights – we hope you enjoy it.

For queries about the online-only content, please contact Digital Editor Abigail Sawyer at a.sawyer@biotechniques.com.

To view it, visit www.biotechniques.com.

BioTechniques is a peer-reviewed journal dedicated to the publication of original laboratory methods, related technical tools, and methods-oriented review articles that are of broad interest to scientists engaged in basic applied life science research. Complete Instructions for Authors are available at: <https://mc04.manuscriptcentral.com/fs-btn>, *BioTechniques'* website for online manuscript submission. All manuscripts should be submitted at this site.
